

Δ.72

COHERENCE MEASUREMENT SYSTEM · COMPLETE REFERENCE GUIDE

A deterministic framework for measuring coherence, identity persistence, developmental maturity, and field-node signatures in people, organizations, and systems.

This document defines every metric, formula, classification, and interpretation in the Δ.72 measurement architecture. The system uses numerology, astrology, lunar phase, geography, and timing as signal layers, then computes coherence across them.

What Δ.72 Measures

Not intelligence. Not status. Not worth. **Coherence maturity** — the degree to which a system can maintain ordered function under real conditions. Three things simultaneously:

Alignment	Are the components working together?
Integrity	Is the structure holding?
Recovery	Can it correct itself when disturbed?

The 0.72 Threshold

In Hebrew gematria, **TON** (Chesed — lovingkindness, mercy) = Chet(8) + Samekh(60) + Dalet(4) = **72**. The coherence threshold is set at this value. A system is considered coherent when its layers agree above the frequency of mercy.

1. Numerology — The Identity Code

Every person carries six core numbers derived from their birth date and full legal name. Each number operates as a signal on a specific frequency.

How Numbers Are Calculated

NUMBER	SOURCE	WHAT IT REPRESENTS
Life Path (LP)	All digits of birth date (MMDDYYYY) summed, reduced to 1-9 or master	Core life purpose. The central theme of your existence. The most important number — everything else orbits it.
Expression (EX)	All letters of full name converted to numbers (Pythagorean), summed, reduced	Talents and abilities. What you're equipped to do. Your destiny — the skills and gifts you carry.
Soul Urge (SU)	Vowels only of full name, summed, reduced	Inner motivation. What you truly want at the deepest level. The private drive no one else sees.
Personality (PE)	Consonants only of full name, summed, reduced	Outer impression. How others perceive you. The mask you present to the world.
Birthday (BD)	Birth day only, reduced	Natural talent. A specific gift you carry, independent of the rest of your chart.
Personal Year (PY)	Birth month + birth day + current year, reduced	Current cycle. The energy of this specific year. Changes annually.
Maturity	Life Path + Expression, reduced	Later life energy. Emerges after ~45. The person you're becoming.

The Pythagorean Letter Table

1	2	3	4	5	6	7	8	9
A J S	B K T	C L U	D M V	E N W	F O X	G P Y	H Q Z	I R

Vowels (A E I O U) → Soul Urge. Consonants (everything else) → Personality. All letters → Expression.

The Numbers: 1 through 9 and Master Numbers

1 Pioneer / Leader Independent, original, driven. The initiator who blazes trails where none exist. Self-directed	2 Diplomat / Peacemaker Sensitive, cooperative, mediating. Finds harmony between opposing forces.	3 Creator / Communicator Expressive, artistic, joyful. Speaks, writes, designs, performs. Social magnetism and
--	--	---

willpower. Shadow: isolation, stubbornness. FIRE/WILL	Emotional intelligence. Shadow: over-accommodation, indecision. EARTH/FORM	creative fire. Shadow: scattered energy, superficiality. AIR/SPIRIT
4 Builder / Organizer Disciplined, methodical, reliable. Creates foundations that last. Systems thinker who builds brick by brick. Shadow: rigidity, resistance to change. EARTH/FORM	5 Explorer / Adventurer Versatile, restless, curious. Craves variety, change, and freedom. Catalyst energy. Shadow: commitment avoidance, excess. FIRE/WILL	6 Guardian / Nurturer Responsible, protective, domestic. Carries others with love. Beauty, healing, community. Shadow: martyrdom, over-giving, controlling through care. EARTH/FORM
7 Sage / Seeker Introspective, analytical, spiritual. Searches for hidden truth beneath the surface. Lives in the mind. Shadow: withdrawal, distrust, isolation. AIR/SPIRIT	8 Executive / Powerhouse Ambitious, authoritative, karmic. Masters the material world. Strategic vision, financial acumen, leadership. Shadow: power obsession, ruthlessness. FIRE/WILL	9 Humanitarian / Visionary Compassionate, idealistic, universal. Serves the greater good. Wisdom through experience. Shadow: impracticality, aloofness. AIR/SPIRIT

MASTER NUMBERS

11 Intuitive Illuminator Heightened intuition, spiritual channel. Inspires others through insight. Operates at a higher octave of 2. Nervous system runs hot. MASTER FIELD	22 Master Builder Manifests large-scale visions into reality. The architect of the impossible. Higher octave of 4. Can build what others only dream. MASTER FIELD	33 Master Teacher The highest master number. Teaches through unconditional love and selfless compassion. Higher octave of 6. Heals by presence alone. MASTER FIELD
---	--	---

Master numbers are not reduced. If your calculation yields 11, 22, or 33, it stays. These carry the qualities of both the master number and its reduced form (11→2, 22→4, 33→6). Master numbers appear in roughly 11% of the population for any given position.

2. Element System

Each number belongs to an elemental family. Elements determine how numbers interact — same-element pairs are harmonious, cross-element pairs create creative tension.

ELEMENT	NUMBERS	QUALITY	EXPRESSION
FIRE / WILL	1, 5, 8	Action, authority, freedom, initiative	Starts, commands, explores — the active principle
EARTH / FORM	2, 4, 6	Structure, nurture, cooperation, foundation	Builds, protects, stabilizes — the forming principle
AIR / SPIRIT	3, 7, 9	Thought, seeking, compassion, vision	Creates, analyzes, serves — the thinking principle
MASTER FIELD	11, 22, 33	Operates above normal range	Channels, architects, teaches — the transcendent principle

A person with numbers concentrated in one element has high Pattern Retention (P) but lower Adaptability (DAS). A person spread across elements has lower P but higher flexibility. Neither is better — they're different coherence signatures.

3. Core Coherence Equation

$$\Delta = (P \times A \times R) / (D + N)$$

Coherence is the product of the good things divided by the sum of the bad things.

Prime Operators

OPERATOR	NAME	FORMULA (FROM NUMEROLOGY)	WHAT IT MEASURES
P	Pattern Retention	$1 - (\text{UniqueNumbers} - 1) / 6$	Does the same pattern persist? Fewer unique numbers = higher retention. A person with three 8s has very high P.
A	Alignment	$\text{MatchingElementPairs} / \text{TotalPairs}$	Do the parts agree? Numbers in the same element (e.g., two Fire numbers) are aligned.

R	Recovery	$1 - \text{OppositionPairs} / \text{TotalPairs}$	Can it return after disruption? Opposition pairs (numbers summing to 10: 1+9, 2+8, 3+7, 4+6) create tension that makes recovery harder.
D	Drift	$\text{AvgDistanceBetweenNumbers} / 8$	How scattered are the numbers? Large gaps between numbers = high drift. Numbers close together = stable.
N	Noise	$1 - \text{NumerologySignal}$	How much interference? Low signal = high noise. The inverse of overall signal strength.

Extended Prime Operators

SYMBOL	NAME	FUNCTION
$\mathcal{M}$	Memory-of-Attractor	Does the system remember what it returns to? The organizing principle that pulls you back to yourself.
$\mathcal{F}$	Flower Return	Does the system return to its organizing geometry? Not just recovery — return to the specific pattern.
$\mathcal{W}$	Windowed Recovery	Can the system recover before the next shock arrives? Recovery speed relative to disruption frequency.
$\mathcal{B}$	Bounded Distortion	Separates harmless bending from structural collapse. You can flex without breaking.
$\mathcal{L}$	Loss-of-Flower	Detects when the return identity is no longer recoverable. The point of no return.

4. Waveform — Each Person as a Standing Wave

The waveform layer converts numerology into a physical wave equation. Each person oscillates at a measurable frequency with a measurable amplitude.

Computation Chain

STEP	CODE	FORMULA	WHAT IT PRODUCES
1	NSig	$(LP+EX+SU+PE+BD+PY) / 54 + \text{MasterMod}$	Numerology Signal. Raw signal strength. 54 = theoretical max (9×6). Master numbers add +0.05 (11), +0.08 (22), or +0.11 (33).
2	Δ	$(P \times A \times R) / (D + N)$	Coherence. How well the numbers agree with each other (see Prime Operators).
3	NS	$\sqrt{(\Delta \times \text{NSig})}$	Node Strength. Geometric mean of coherence and signal. Both must be high for a strong node.
3b	NS_Δ72	$(NS + 0.72) / 2$	Anchored Strength. Pulled toward the Chesed threshold — nobody starts at zero.
4	I	$(LP + EX + SU) / 27 + \text{master bonus}$	Intensity. Activation energy from the three strongest identity numbers.
5	FI	$0.35\Delta + 0.25NS + 0.25\text{NSig} + 0.15I$	Frequency Index. How fast your wave oscillates. Close frequencies between two people = resonance.
6	AF	$\sqrt{(NS \times I)} \times 0.75$	Amplitude Field. How far your wave reaches. Signal presence and strength.
7	W(t)	$AF \times \sin(2\pi \times FI \times t + \phi)$	Waveform. You as a wave. Amplitude = how loud. Frequency = how fast. Phase (φ) = your offset.

Why Waveforms Matter

When two people's waveforms are close in frequency, they create **constructive interference** — their signals amplify each other. When frequencies diverge, they create **destructive interference** — their signals cancel. This is computed via the Synchronization Index (SI).

5. Derived Scores

CODE	NAME	FORMULA	QUESTION IT ANSWERS
------	------	---------	---------------------

DIS	Identity Score	$0.35M + 0.25P + 0.20A + 0.20R$	"Does this person know who they are?" Not personality — identity <i>persistence</i> . Can you get knocked around and still be you?
DMI	Maturity Index	$0.30C + 0.25R + 0.20I + 0.15S + 0.10D$	"How developed is this system?" Not age or intelligence — <i>coherence maturity</i> . Can you learn without losing yourself?
DRS	Recovery Score	Recovered / Lost	"How well do you bounce back?" Speed and completeness of return after disruption.
DDS	Drift Score	Distance / MaxDist	"How far off course are you?" Lower is better. Unconscious deviation from your natural attractor.
AMS	Attractor Memory	Returns / Perturbations	"Can you find your way home?" After you get pushed, do you remember what you're returning <i>to</i> ?
DAS	Adaptability	Adaptations / Changes	"Can you change without breaking?" Living flexibility vs rigid stability. Bend without snapping.
SAI	Soul Attractor	$0.40SA + 0.30SRS + 0.30PSR$	"What pattern keeps recurring?" Symbolic layer — archetypal repetition, karmic numbers, soul resonance.
SI	Synchronization	$\text{freq_ratio} + \text{amp_match} + \text{elem_sync} + \text{interference}$	"Do these two people amplify or cancel each other?" Pairwise waveform alignment.

6. Node Classification

Based on coherence and intensity relative to the $\Delta.72$ threshold:

CLASS	RULE	MEANING
Power Node	Coherence ≥ 0.72 AND Intensity ≥ 0.72	All systems aligned and actively firing. Full coherence under power.
Stable Node	Coherence ≥ 0.72 , Intensity < 0.72	Pattern holds strong but energy is latent. The potential is there but not fully expressed.
Distortion Node	Coherence < 0.72 , Intensity ≥ 0.72	High energy but misaligned. Power without direction — potentially destructive.
Transitional	Mixed signals	Between states. In flux. Could stabilize in any direction.
Dormant Node	Low activation + low strength	Potential not yet activated. The system exists but hasn't been turned on.

7. Classification Scales

DIS — IDENTITY CLASSIFICATION

0.85 — 1.00	Coherent Identity
0.70 — 0.84	Stable Identity
0.50 — 0.69	Forming Identity
0.30 — 0.49	Unstable Identity
0.00 — 0.29	Fragmented Identity

DMI — MATURITY CLASSIFICATION

0.85 — 1.00	Master / Stabilized
0.70 — 0.84	Mature
0.50 — 0.69	Developing
0.30 — 0.49	Emerging
0.00 — 0.29	Fragmented

8. Archetypes

Each numerology number maps to an archetype. A person's dominant archetype is determined by which numbers appear most prominently across their chart.

1 · Pioneer Starts new paths	2 · Diplomat Bridges divides	3 · Creator Expresses & designs	4 · Builder Creates foundations
5 · Explorer	6 · Guardian	7 · Sage	8 · Executive

Experiments & discovers	Protects & stabilizes	Researches truth	Leads & scales
9 · Humanitarian Serves the whole	11 · Visionary Sees beyond	22 · Master Builder Impossible architect	33 · Teacher Heals through love

Composite Archetype: Architect

$$\text{Architect} = (\text{Visionary} + \text{Builder} + \text{Sage} + \text{Executive}) / 4 + 0.10$$

Not a number — a composite. Combines vision, structure, analysis, and executive power. The systems designer who creates frameworks.

Archetype Scoring (Allison's Formula)

$$A_x = 0.40N_x + 0.35B_x + 0.15C_x + 0.10R_x$$

N = Numerology weight, B = Behavioral evidence, C = Coherence alignment, R = Repetition across life domains (work, relationships, creativity, crisis response, spiritual framework). Top 3 scores form the **archetype stack**.

9. The Five Measurement Layers

$$\text{Node}(x,t) = \text{Coherence}(N,A,M,G,T) \times \text{Intensity}(N,A,M,G) \times \text{Activation}(T)$$

Layer	Code	Source	What It Adds
Numerology	N	Birth date + full name	Identity code — the baseline signal
Astrology	A	Birth time + location → planetary positions	Sun, Moon, Ascendant, Midheaven, all planets on the ecliptic
Moon	M	Lunar phase at birth	Phase angle, illumination %, moon sign. Gate points (new/quarter/full) = high activation
Geography	G	Birth coordinates → ley line proximity	Distance-decay (300km half-life) to earth grid points, sacred sites, ley lines
Timing	T	Personal year/month + transits	Current cycle energy — the only layer that changes over time

10. Complete Metric Stack

The Δ .72 Canonical Measurement Architecture — 36 metrics across 13 layers, flowing from 10 prime operators through derived scores to waveform and archetype outputs.

LAYER	CODE	NAME	STATUS
Prime	P	Pattern Retention	✓ implemented
	A	Alignment	✓ implemented
	R	Recovery	✓ implemented
	D	Drift	✓ implemented
	N	Noise	✓ implemented
	$\mathcal{M}$	Memory-of-Attractor	estimated
	$\mathcal{F}$	Flower Return	needs observation
	$\mathcal{W}$	Windowed Recovery	needs time series
	$\mathcal{B}$	Bounded Distortion	needs observation
	$\mathcal{L}$	Loss-of-Flower	needs observation
Core	Δ	Coherence	✓ implemented
Derived	DIS	Identity Score	✓ implemented
	DMI	Maturity Index	✓ implemented
	DRS	Recovery Score	✓ implemented
	DDS	Drift Score	✓ implemented
	AMS	Attractor Memory	✓ implemented
	DAS	Adaptability	✓ implemented
	SAI	Soul Attractor Index	✓ implemented
Time	CV	Coherence Velocity	needs Δ over time
	CA	Coherence Acceleration	needs CV over time
Network	SI	Synchronization Index	✓ implemented
	IR	Influence Radius	needs network data
Info	CE	Compression Efficiency	abstract metric

	CY	Coherence Yield	needs output data
Wave	NSig	Numerology Signal	✓ implemented
	NS	Node Strength	✓ implemented
	FI	Frequency Index	✓ implemented
	AF	Amplitude Field	✓ implemented
	W(t)	Waveform	✓ implemented

20 of 36 metrics implemented. Remaining 16 require longitudinal time-series data, network propagation measurements, or direct behavioral observation.

Disclaimer: This framework is a conceptual measurement architecture. These formulas are framework constructs designed for symbolic interpretation and systematic analysis. They are not validated scientific measurements unless independently tested against empirical datasets with reproducible results. — A.L.H., Measurement Framework v1.0
