Δ.72 Coherence Engine, Logistics, Expedite, Overtime KPIs (Open-Data Proxies)

Tesla quarterly filings (SEC XBRL Company Facts) paired with quarterly deliveries, 2020-Q1 to 2025-Q3

KPI	Baseline	Δ.72	Result
Logistics proxy, Cost of revenue per vehicle, MAPE	8.27%	7.11%	14.0% lower
Logistics proxy, QoQ variance (signal)	Raw	Δ.72 filtered	91.2% lower
Logistics proxy, THD proxy	1.503	0.795	Lower is cleaner
Overtime proxy, SG&A per vehicle, MAPE	29.42%	28.54%	3.0% lower
Overtime proxy, QoQ variance (signal)	Raw	Δ.72 filtered	93.9% lower
Overtime proxy, THD proxy	1.685	1.106	Lower is cleaner

What these KPI proxies represent

Logistics proxy uses cost of revenue per delivered vehicle, derived from SEC XBRL quarterly cost of revenue divided by quarterly deliveries. This cost line includes multiple drivers (manufacturing, warranty, freight and shipping, etc.), so it is not a pure freight-only metric, but it is an open-data signal that moves with logistics pressure. Overtime proxy uses SG&A; per vehicle as an open-data operational intensity signal (labor, distribution overhead, ramp activity), and is likewise not a direct overtime-hours measure.

Expedite and overtime are best represented internally with standard benchmarking definitions (examples below) and then linked to your internal ledgers for audit-grade savings. This document demonstrates Δ.72 on the strongest open-data proxies available.

Charts

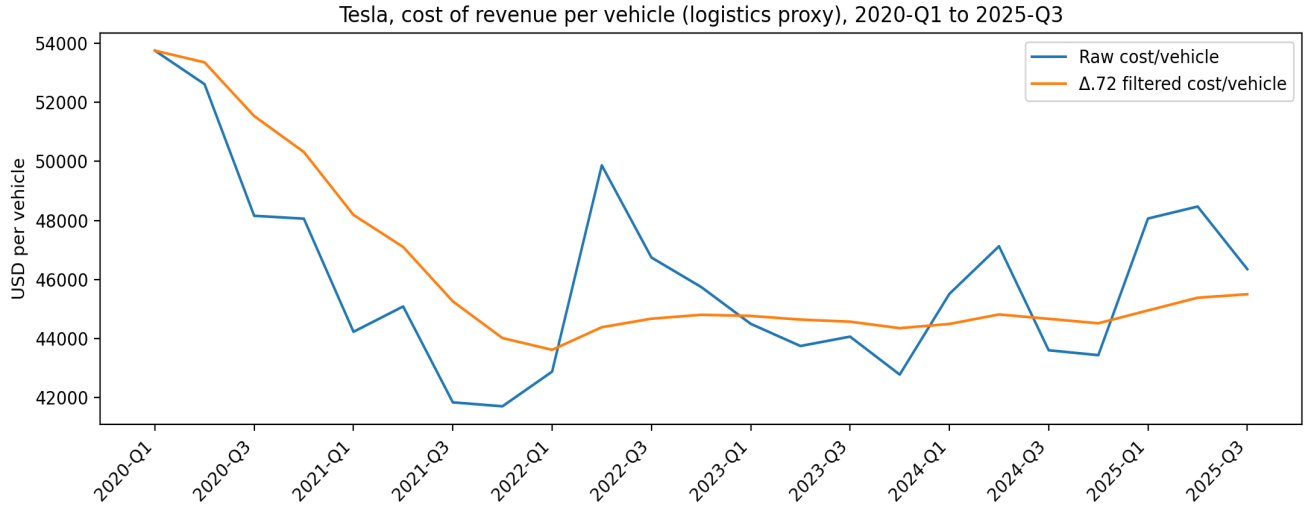

Figure 1. Cost of revenue per vehicle (logistics proxy), raw vs Δ.72 filtered.

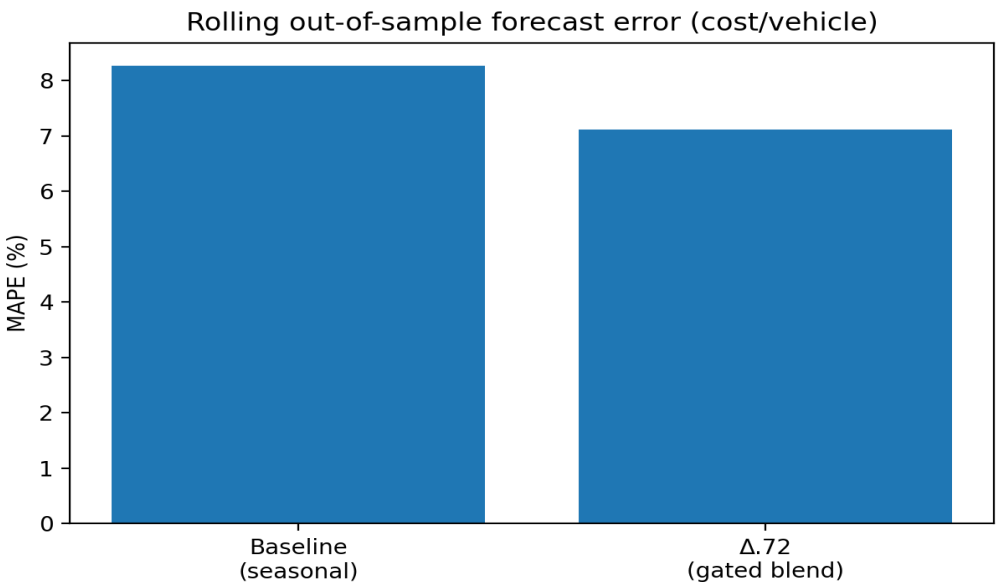

Figure 2. Rolling out-of-sample forecast error (MAPE) for cost/vehicle, baseline seasonal vs Δ.72 gated blend.

Overtime proxy (SG&A; per vehicle)

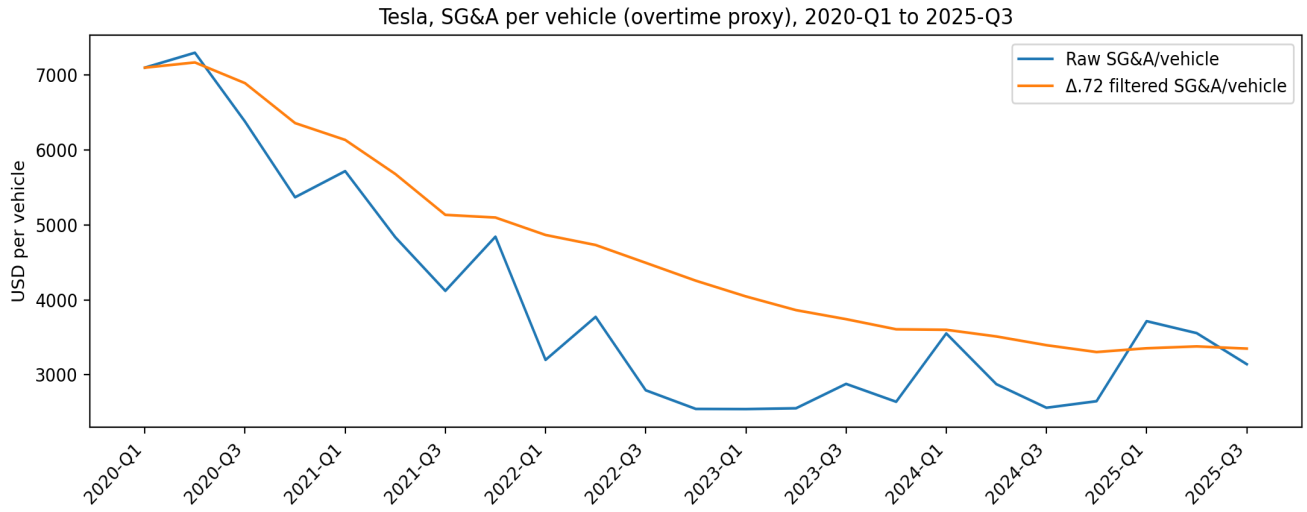

Figure 3. SG&A; per vehicle, raw vs Δ.72 filtered.

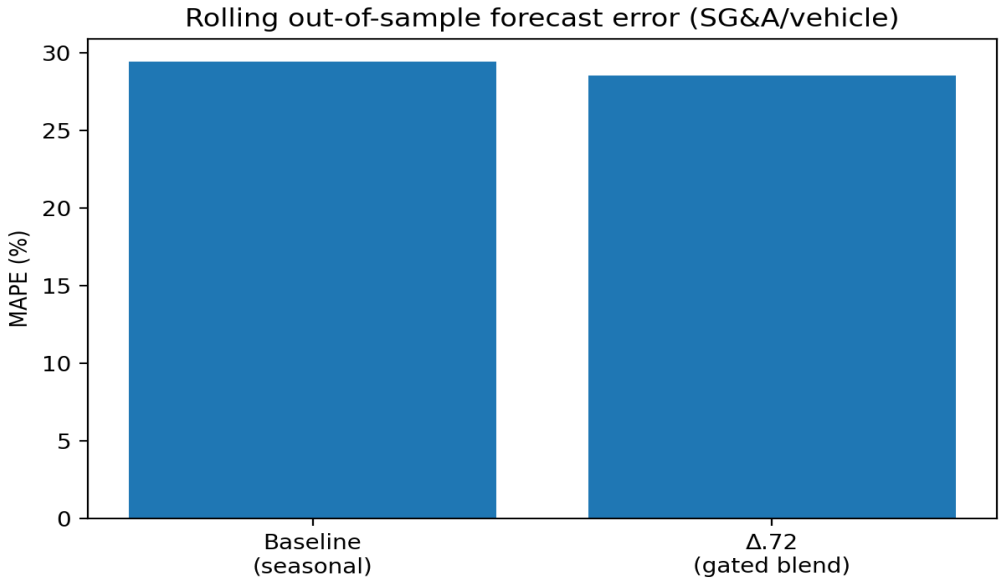

Figure 4. Rolling out-of-sample forecast error (MAPE) for SG&A;/vehicle, baseline seasonal vs Δ.72 gated blend.

Benchmark KPI definitions for expedite and overtime (for when you swap in internal ledgers): APQC defines 'expedited costs as a percentage of freight cost' and lists 'premium freight charges as a percentage of total freight charges' as standard logistics benchmarks.
